Cook Children’s Medical Center
cochlear implant program

Cook Children’s Cochlear Implant Team offers comprehensive evaluation, audiological follow-up, and (re)habilitation treatment for children receiving cochlear implants. A cochlear implant provides access to hearing within speech ranges for children with severe to profound hearing loss. Our team is comprised of a pediatric otolaryngologist, audiologists, speech-language pathologists, auditory-verbal therapist, and other specialists.

As part of the evaluation process, your child may have the following tests:

**Medical**
- MRI
- Genetics
- Laboratory tests
- Otolaryngology evaluation

**Audiology**
- Comprehensive audiology evaluation
- Hearing aid testing and trial use
- Consultation regarding cochlear implant selection
- Cochlear implant device programming
- Cochlear implant device troubleshooting

**Pediatric Aural Rehabilitation**
- Pre and post cochlear implant evaluation
- Trial therapy before cochlear implant
- Auditory-verbal therapy
- Consultation regarding cochlear implant selection
- Post Cochlear implant rehabilitation
- Consultation about educational placement
- Coordination/collaboration with school personnel

Cook Children’s Cochlear Implant Team includes pediatric otolaryngologist, Dr. Paul Bauer, M.D., and pediatric audiologists and speech-language pathologists. Please visit www.cookchildrens.org for the names and credentials of our specialists.
