

New onset seizures

New onset seizures are treated within the Level 4 Comprehensive Epilepsy Program at Cook Children's.

Our team is highly experienced and has the latest technology, including 3D brain mapping and a 10 bed EMU, with wireless monitoring.

Our program sees more than 13,000 infants and children with seizures each year.

Our Neurosciences team includes:

Neurologists

Neurosurgeons

Pediatric nurse practitioners

Child Life specialists

Parent liaison

Rehabilitation therapists

Speech therapists

ABRET accredited EMU

Research coordinators

Neuropsychologists

Case managers

Social workers

Our team works collaboratively to ensure each child receives the best possible care and that the family is involved. Additionally, 35 other specialties and subspecialties are on site if a child may need additional care.

To speak with one of our neurologists, please call 682-885-2500.
